

Telescopic carbon pole for insecticidal treatments in height.

MAXIMUM REACH

The PestXtend extends up to 24 feet (7.3 m), giving you full control and precision even on elevated targets. Ideal for treating high areas without ladders or risky setups.

ULTRA-LIGHT CARBON BODY

Made from strong, rigid, and feather-light carbon fiber, it enhances efficiency and reduces fatigue during long treatments.

FLEXIBLE HOSE MANAGEMENT

A transparent hose allows you monitor powder flow and detect any blockages instantly. The hose can be mounted inside or outside the pole using integrated clips - choose what works best for you.

ONE-HAND OPERATION

The included shoulder bag holds both your PestBlaster and the PestXtend. Operate comfortably with one hand on the pole and the other on the trigger — light, balanced, and effortless.

INCLUDED IN THE BOX

- Telescopic carbon pole
- Cobweb duster
- Internal and external connectors
compatible with the PestBlaster and other applicators
- Two hoses (with caps)
- Pipes and nozzles
- Quick-connect adapters
- Shoulder carry bag for PestBlaster
